Work Experience

All In One Tech Solutions **Nov 2024 – Present**

Jr. Software Engineer (Remote) *58 Kitchener Parade, Bankstown, NSW 2200, Sydney, Australia*

- Working with a team of 4 in the development of **TradeFlow**, a business workflow automation platform, focusing on the ReactJS frontend integrated with Django REST APIs.
- Involved with post-development activities like AWS S3, EC2 instance management and post-production issue solving.
- Engineered an **email automation system** during internship, integrating ReactJS-based frontend with FastAPI backend services.

Prionty Digitals **May 2024 – October 2024**

Software Developer (Remote and Contract) *Banani, Dhaka - 1213, Bangladesh*

- Participated in the development of a feature-rich **CMS**, implementing core functionalities using React, Node.js and PostgreSQL.
- Developed a **server-side image compressor** to enhance backend efficiency and reduce storage usage.
- Configured **in-memory caching** using **Redis** to accelerate API response times by **2x.**
- Deployed the product into **Hostinger VPS service - KVM2**.

Technical Skills

Languages: Javascript, Python, Golang

Libraries/Frameworks: ReactJS, NextJS, NodeJS, ExpressJS, FastAPI, Gin

Databases: PostgreSQL, MySQL, MongoDB

Developer Tools: Git, Postman, Docker, Prisma, Jira

Cloud Services: CI/CD, AWS Cloud Services (Elastic Beanstalk, EC2, Amplify, S3, Route53), Hostinger Cloud Services

AI Tools: Claude Code, Copilot, Antigravity and Cursor

Competitive Programming

- Proven problem-solving proficiency by solving **350+** problems and actively competing in **20+ online and offline contests.**
- Online Judge Platforms Profile : **Codechef (Max-1355)**, **Codeforces (Max-1022)**.

Professional Projects

TradeFlow | *Website* **ReactJS | Django | Frontend Developer**

* Built for specially international import-export, trading and sourcing agents. With facilties of Orders, Buyers, Supppliers, Products, Freights and Accounting Management modules
* Implemented interactive analytics dashboards (country-wise buyer/supplier performance charts, trend reports) integrated with **Django REST** APIs for data-driven decision-making.
* Developed reusable components and integrated APIs with frontend caching and lazy load facility to improve performance.
* Collaborated with 2 backend developers to define API contracts for order management, document optimization, and report exports within a 4-member cross-functional team.

Zyxark | *Website* **ReactJS | Go (Gin) | Team Lead**

* Led a 3-developer team to build Zyxark, a luxury stays & experiences booking platform, coordinating work across the React frontend and Go (Gin) backend services.
* Architected booking, search, and reservation flows via RESTful Go APIs, optimizing for reliability and scalability under concurrent booking requests.
* Managing cloud services via **AWS Amplify** and **Elastic Beanstalk** with **CI/CD workflow**.

Education

University of Information Technology and Sciences **CGPA : 3.50 | Graduation : July 2025**

Bachelor of Science in Computer Science and Engineering

- **Learned Courses (Specifics):** Structured Programming Language, OOP, Data Structures, Algorithms, Database Management System, Computer Architectures, Software Project Design and Development.

Language Proficiency

- English - Comfortable
- Bangla - Native
